BioSeedXL to Offer services for BioTech and Cannabis Startups

March 29, 2019 | News

BioSeedXL is planning to support the business needs of startups and supply a variety of services as needed

After four companies successfully graduated from its acceleration program, BioSeedXL, an Israel based company has decided to officially open its doors and offer its services to a select and hand-picked number of Biotech and Cannabis startup companies.

BioSeedXL's experienced staff took a part in the first startup to be SOLD in Israel in the field of Cannabis pharmaceuticals to a publicly traded company when Kalytera Therapeutics acquired the Israeli medical cannabis developer Talent Biotechs Ltd. In addition, BioseedXL has deep experience in IPO's on the TASE and NASDAQ exchanges.

BioSeedXL staff will attend CannaTech Tel Aviv 2019 in Tel Aviv on April 1st and 2nd and host a booth where new startup companies interested in development and breaknthroughs are more than welcome to come and interact.

Many companies, especially startups, fail due to limited resources, management or financial mistakes and/or lack of connections. BioSeedXL is planning to support the business needs of startups and supply a variety of services as needed.

BioSeedXL's main goal is to lead each one of its startups toward excellence and to fulfill their true potential.
