University of Birmingham inks new pact with Southeast University

October 28, 2019 | News

Signed Cooperation Agreement on Joint Research Center for Biological Big Data Science

University of Birmingham in UK has signed a Memorandum of Understanding (MoU) with Southeast University, located in Nanjing, Jiangsu, China. The MoU has been signed as a “Cooperation Agreement on Joint Research Center for Biological Big Data Science”.

At the MoU siging, the representatives of the two universities shared introduction and exchanged ideas about the existing cooperation, the construction of Southeast University- University of Birmingham Biomedical Engineering Joint Research Center, the foundation and the cooperation in biomedical big data, etc.

It is reported that since the establishment of the cooperative relationship with the University of Birmingham, professors from both parties have carried out a number of fruitful cooperation. In May 2018, Southeast University-University of Birmingham Biomedical Engineering Joint Research Center was unveiled in Suzhou. In October of the same year, the University of Birmingham-Southeast University Biomedical Engineering Joint Research Center was unveiled at the University of Birmingham. It is expected that such joint research centers could give full play to their respective advantages, strengthen scientific research cooperation, lead the development of biomedical engineering technology, and thus make contributions to the innovation in the medical apparatus industry.
