Cryoviva Singapore expands Cord Blood Banking services to Bahrain

September 8, 2021 | News

Cryoviva continues with its expansion plans into more countries in the Middle East and ASEAN

Local family cord blood bank Cryoviva Singapore is continuing with its rapid geographic growth plans with an entry into the Bahrain market. This latest new market entry closely follows Cryoviva establishing a footprint in Dubai to serve couples in the UAE that are on the family way.

"We are steadfastly focused on our goal to give every family the chance to benefit from the medical potential of cord component stem cells should they ever need it. Our excellent credentials as a well-established cord blood bank with a proven track record experienced medical and management teams and strong investor backing make us a reliable and trustworthy provider for young families in Bahrain. We look forward to collaborating with healthcare providers in Bahrain offering maternity services to offer greater service to their valued patients" says Rajesh Nair, CEO of Cryoviva Singapore.

Cryoviva continues with its expansion plans into more countries in the Middle East and ASEAN.
