IQVIA collaborates AstraZeneca to support potential COVID-19 vaccine development

July 22, 2020 | News

The partnership drives AZD1222 development in the US

IQVIA™, on 14 July 2020 announced its collaboration with AstraZeneca to accelerate the development of a potential new vaccine for COVID-19. This joint initiative is part of the U.S. government's recently announced Operation Warp Speed project.

Operation Warp Speed is part of a broader strategy to accelerate the development, manufacturing, and distribution of COVID-19 vaccines, therapeutics, and diagnostics. The specific IQVIA and AstraZeneca collaboration will drive faster delivery of clinical studies in the U.S. aimed at demonstrating efficacy of AstraZeneca's potential COVID-19 vaccine, AZD1222. This initiative includes an expansive subject study, which is expected to begin enrolling participants this summer and will leverage IQVIA's Virtual Trial solutions including Study Hub.
