Abbott separates its R&D arm

Singapore: Abbott has decided to separate its research-based pharmaceuticals business, which will be known as AbbVie. Abbott also declared a special dividend distribution of all of the outstanding shares of AbbVie common stock.

AbbVie will be a research-based specialty biopharmaceuticals company with a broad portfolio of medicines, including leadership in immunology and virology, and a pipeline of breakthrough therapies. Abbott will be remain a science-based healthcare company with diversified market-leading offerings in diagnostics, medical devices, nutritionals and branded generic pharmaceuticals.

For every share of AbbVie common shares held, Abbott shareholders will receive one share of AbbVie common stock. No fractional shares of AbbVie will be issued. Shareholders will receive cash in lieu of fractional shares. The special dividend distribution is expected to be paid on January 1, 2013, to Abbott shareholders of record as of the close of business on December 12, 2012.

Abbott received a private ruling from the US Internal Revenue Service, for US federal income tax purposes, that the distribution of AbbVie common stock is tax-free to US holders of Abbott common stock. However, cash received in lieu of fractional shares may be taxable to such holders. Abbott expects to mail the information statement to all shareholders entitled to receive the distribution of shares of AbbVie common stock in mid-December.

"The announcement marks another important milestone toward the completion of our business separation," said Dr Miles D
