

## Rgenix raises \$40 M in series C funding

12 October 2018 | News

**Lepu Holdings Limited leads the financing syndicate and is joined by existing major investors Novo Holdings A/S and Sofinnova Partners.**

Rgenix, Inc., a clinical stage biopharmaceutical company developing first-in-class small molecule and antibody cancer therapeutics, announced that it has raised \$40 million in a Series C financing in support of further development of the company's clinical and pre-clinical oncology programs and for general corporate purposes.

The Series C financing was led by Lepu Medical, a publicly traded global healthcare firm, and includes Oceanpine Capital and WuXi AppTec's Corporate Venture Fund. Existing investors also participated in the financing round, including Novo Holdings A/S, Sofinnova Partners, Alexandria Venture Investments, LLC, and the Partnership Fund for New York City's Innovate NY Fund and associated entities.

The financing will support Phase 1b/2 clinical trials of the lead program RGX-104 in multiple cancer indications, including in checkpoint inhibitor refractory patients. It will also support early clinical development of RGX-202, a first-in-class cancer metabolism program, as well as discovery stage programs arising from the Rgenix target discovery platform.
