Cipla receives approval for Pfizer's Depo-Provera

January 28, 2019 | News

It is a progestin indicated only for the prevention of pregnancy

Global pharma company, Cipla has announced that it has received final approval for its Abbreviated New Drug Application (ANDA) for Medroxyprogesterone Injectable, 150mg/mL from the United States Food and Drug Administration (US FDA).

Cipla's Medroxyprogesterone Injectable, 150mg/mL is AB-rated generic therapeutic equivalent version of Pfizer's Depo-Provera. It is a progestin indicated only for the prevention of pregnancy.

According to IQVIA (IMS Health), Depo-Provera and its generic equivalents had US sales of approximately $159M for the 12-month period ending November 2018.
