

Medical Insurance for basic services at SCMCC

21 February 2019 | News

The centre develops individualized diagnosis and treatment scheme for each patient and discusses each clinical radiotherapy plan with the clinician, dosimetrist and physicist team of MD Anderson.

Concord Medical Services Holdings Limited, a leading specialty hospital management solution provider and operator of a network of radiotherapy and diagnostic imaging centres in China, has announced that the nuclear magnetic resonance imaging and cancer radiotherapy services of its Shanghai Concord Medical Cancer centre (SCMCC) have been covered by medical insurance recently.

As such, the basic medical services of the centre, including general outpatient registration, chemotherapy, linear accelerator radiotherapy, blood examination, image examination (such as nuclear magnetic resonance, CT, ultrasound, molybdenum target, electrocardiogram), medicines and consumables, have been fully covered by medical insurance.

The centre develops individualized diagnosis and treatment scheme for each patient and discusses each clinical radiotherapy plan with the clinician, dosimetrist and physicist team of MD Anderson. A team of doctors, technicians and physicists provide precise treatment services, and senior nurses lead the whole course management services.

The centre follows the standardized international quality control standards, such as the medical process and quality control system of MD Anderson Cancer centre in the United States, in such aspects as precise treatment, thoughtful care and emergency measures, to provide security for patients' treatment.
