

HLT, PPD collaborate to enhance drug development

21 February 2019 | News

Unique collaboration pairs HLT's data technology and artificial intelligence with PPD's global expertise in clinical trials and real-world evidence generation

Pharmaceutical Product Development, LLC (PPD) and Happy Life Tech (HLT) of China have signed an exclusive agreement to develop a distinctive service offering for the China drug-development market delivering data science-driven clinical trials and real-world evidence of drug products' effectiveness, safety and value.

The strategic collaboration is designed to enhance global pharmaceutical companies' access to China's evolving drug development and post-marketing ecosystem to address unmet clinical needs in China, while enhancing research capabilities for the Chinese pharmaceutical industry in the global market. The combined service offerings are powered by HLT's artificial intelligence (AI) and data technology and PPD's global expertise in clinical trial management and evidence generation.

HLT contributes an unparalleled ability to generate AI-enabled solutions and its growing network of prominent physicians and more than 100 leading hospitals in 22 Chinese provinces. Capitalizing on PPD's global clinical research resources and China footprint, the collaboration intends to provide pharmaceutical and biotechnology clients with unsurpassed services in China, including clinical study protocol design, site selection, patient recruitment and real-world evidence.

"Our collaboration with HLT will provide PPD's clients with exciting new opportunities in China," said David Simmons, chairman and chief executive officer of PPD. "Our focus on sites with access to eligible patients is designed to speed patient recruitment at high-performing sites and to more effectively incorporate Chinese patients into global trials. We will help clients adapt study protocols to the China market, while helping sites enhance quality, drive performance and lead global multicenter trials. In addition, we will intelligently leverage real-world data in China to recruit patients with a high potential for participation in our clients' studies and to generate real-world insights needed for market access and product uptake."

Rujing Gong, founder of HLT, said, "I am very excited about this collaboration. We believe a joint effort between PPD and HLT will empower our clients with unique solutions, significantly increase trial efficiency, reduce costs and ultimately benefit patients in China and around the world. We'll also help the Chinese pharma industry be more competitive in the global market

through a better registration strategy. China's research capability has been developing quickly and will play an important role in the global clinical development market in the future. We have strong interest in being involved and in driving the process."

The companies' exclusive collaboration focuses on data-driven feasibility, patient recruitment and real-world evidence offerings for both global and China-based pharmaceutical and biotech companies.

PPD has nearly 20 years of extensive experience in Asia-Pacific and provides a broad range of Phase I-IV services in the region. The company's global capabilities include clinical trial operations based in Beijing and Shanghai and central laboratory facilities in Shanghai. PPD's Evidera business unit is the preeminent provider of evidence-based solutions to demonstrate the real-world effectiveness, safety and value of biopharmaceutical and biotechnology products from early development through loss of exclusivity.

PPD is a leading global contract research organization providing comprehensive, integrated drug development, laboratory and lifecycle management services. Our clients and partners include pharmaceutical, biotechnology, medical device, academic and government organizations. With offices in 48 countries and more than 21,000 professionals worldwide, PPD applies innovative technologies, therapeutic expertise and a firm commitment to quality to help clients and partners bend the cost and time curve of drug development and optimize value in delivering life-changing therapies to improve health.

HLT is a leading medical AI company dedicated to transforming the relationship between humans and diseases. HLT has in-depth cooperation with regulators, universities and research institutes in China and other countries. Full lifecycle solutions of HLT, including clinical trials, post-launch development of drugs, product launch and real-world studies, significantly accelerate the process of new drug development. In addition, HLT's reports based on real-world insights have been published in *The Lancet Oncology*, *Nature Medicine* and other top journals.
