# GCAM opens new plasma collection centre

March 26, 2019 | News

**Growing number of GCAM centres on track with two additional openings this year**

GCAM, Inc., headquartered in Fullerton, CA, was established in 2009 and a member of South Korea's GC group of companies. GCAM runs source plasma centres in the United States. Its sister company, GC Pharma operates biopharmaceutical businesses on a global scale.

GCAM has added additional plasma collection centres; located in Brownsville, Texas. With the newest additions, GCAM now runs 10 plasma donation centres nationwide.

"Two additional plasma collection centre will be established this year," said Jay Bae, GCAM President. "We are bringing job opportunities to the local communities and helping local economics."

Human plasma is the essential source for products to treating patients suffering from many different life-threatening disease and conditions, including immune deficiencies, hemophilia and other blood disorders.

GC Pharma is one of the largest protein therapies manufacturers in the world. GCAM collects high quality source plasma for GC Pharma and other plasma fractionators. GCAM can collect up to 550,000 liters of source plasma annually.
