WuXi Diagnostics opens first research facility in the US

September 24, 2019 | News

To bring more personalized and accurate clinical diagnosis services for global patients.

China headquartered WuXi Diagnostics has announced the plan to open its first U.S.-based research and diagnostic testing development facility in Rochester, Minnesota to accelerate esoteric diagnostic product development, and bring more personalized and accurate clinical diagnosis services for global patients.

The new facility is located in One Discovery Square, a new health technology and life sciences center inRochester.

The facility is expected to open before the end of the year and will serve as a center for clinical diagnostic testing optimization and development.

WuXi Diagnostics' researchers and technicians will leverage this facility to optimize existing diagnostic tests and to collaborate in the development of new diagnostic tests with Mayo Clinic's Department of Laboratory Medicine and Pathology, specifically its Advanced Diagnostics Laboratory.

"Our new facility will directly contribute to our further cooperation with Mayo Clinic," saysJason Liu, Ph.D., Chief Executive Officer of WuXi Diagnostics. "It will leverage WuXi Diagnostics' research and development capability and Mayo Clinic's advanced clinical practice to accelerate esoteric diagnostic product development and to transform discoveries into diagnostic tests that will benefit all."
