

Immutep receives A\$2.5 M R&D tax incentive from French Govt

14 October 2019 | News

The funds will be used to support the ongoing and planned global clinical development of eftilagimod alpha

Immutep Limited, an Australian biotechnology company developing novel immunotherapy treatments for cancer and autoimmune diseases, is pleased to announce that it has received a €1,568,399 (~ A\$2,546,929) research and development (R&D) tax incentive payment in cash from the French Government under its Crédit d'Impôt Recherche scheme (CIR).

The “Crédit d'Impôt Recherche” (CIR), meaning “Research Tax Credit”, is a French government tax incentive by which French companies conducting research and development activities in Europe can be reimbursed 30% of their eligible expenditure.

Immutep qualifies to receive CIR tax incentive through its subsidiary Immutep S.A.S. due to the research and development conducted in its laboratory at Châtenay-Malabry in southwestern Paris.

The funds will be used to support the ongoing and planned global clinical development of eftilagimod alpha and the preclinical development of IMP761.
