

Taiwan prepares for post COVID-19 era with emerging technologies

17 June 2020 | News | By Manbeena Chawla

Healthcare+ Expo Taiwan, 3-6 December 2020

The Covid-19 pandemic spurs transformation of digital healthcare everywhere. To echo that trend, the [Healthcare+ Expo Taiwan](#) will bring together 300 technology giants and healthcare providers to exhibit healthcare-centred applications and solutions powered by AI, IoT, bio-sensor, 8K image tech and 5G to then ignite fresh ideas amongst those with desires to reinvent the way healthcare used to be delivered.

ICT's showroom for health tech and solutions

Multinational companies choose to partner with Taiwan because of the nation's high quality and productivity of IC design and manufacturing, hardware and software integration. With over decades of experience in technology and healthcare combined, Taiwan-based tech sector has been able to assist countries around the world putting in place with smart hospital solutions, wireless body sign tracking and monitoring systems, AI-assisted medical imaging systems, point of care solutions, 5G and UV LED robots, in a relatively short time.

Healthcare supply chain: reboot and rebuild

The Healthcare+ Expo will therefore introduce a grand convention aiming at healthcare supply chain in the APAC region, more than 30 industrial associations from the region will be invited to meet face to face to clarify demand-supply needs and work together to create a wider supplier network.
