

HKBN unveils UV-C disinfection to fight COVID-19

27 August 2020 | News

For as low as HK\$839, HKBNES offers the Philips UV-C Disinfection Desk Lamp with free delivery

HKBN Enterprise Solutions has announced the launch of innovative, one-stop disinfection solutions to help companies maintain business continuity amid the COVID-19 outbreak.

As the first ICT service provider in Hong Kong to collaborate with Signify (formerly Philips Lighting), the world leader in lighting, HKBNES will offer comprehensive solutions with proven UV-C lighting and smart IoT technologies to companies and institutions seeking to create a virus-free environment for their customers and employees.

These disinfection solutions comprises a portfolio of UV-C based disinfectant products -- with validated effectiveness on inactivating COVID-19 virus in a matter of seconds*, for easy sterilisation of air, surfaces and objects. UV-C lighting can be applied to a wide variety of settings, such as offices, schools, retail stores and restaurants, enabling them to continue operations in a safe environment.

For as low as HK\$839, HKBNES offers the Philips UV-C Disinfection Desk Lamp with free delivery. HKBNES can support larger scale deployment with end-to-end service that includes consultation, planning, product delivery, installation and maintenance. When integrated as part of its range of smart office solutions, HKBNES can provide additional safety measures by equipping UV-C luminary deployment with IoT sensors and controls, ensuring the luminaries to operate safely.
