Abexome collaborates with Bioneeds

March 28, 2013 | News | By BioSpectrum Bureau

Bangalore: Abexome Biosciences, an analytical solution provider to the biopharmaceutical industry and Bioneeds, a leading OECD GLP certified pre-clinical service provider in India, will collaborate in providing pre-clinical and core biology services to pharmaceutical and biopharmaceutical companies in India using their complementary capabilities.

Under this agreement, Abexome and Bioneeds will provide end-to-end solutions including custom antibody and ELISA method development, pharmacokinetic studies, regulatory toxicity studies and in vivo and in vitro efficacy assays for drug screening.

Commenting on the collaboration, Dr Vinay Babu, MD, Bioneeds, said that, "In the past few years Bioneeds has emerged as a leading provider of pre-clinical services whereas Abexome has established its name in the area of ELISA assay method development and cell-based assay development."

Dr Babu added, "This collaboration will enable both organization to access each other's complementary capabilities and offer a wider spectrum of services to pharma and biotech companies particularly biopharmaceuticals."

Dr Sujan K Dhar, CEO, Abexome, said that, "The capabilities of Abexome and Bioneeds are very complementary and we are the ideal partners for each other to create a synergy in form of this collaboration. We are glad to partner with Bioneeds and we believe this partnership can bring more delight to the customers thereby increasing the business value for both organizations."
