Malaysia's disinfectant Nanovon makes headway into Qatar, Russia, & Central Asia

February 26, 2021 | News

Voneco's NanovonÃ¢â??Â¢Ã¯Â¸Â is a globally benchmarked, nano-coating, with a self-disinfecting capability for up to 365 days on surfaces

Voneco's Nanovon™Ã¯Â¸Â, a scientifically-substantiated self disinfectant nano-coating hosted a strategic presentation to the Russian, Qatari, & Central Asian ambassadors in Malaysia. The session was officiated by the honorable, former prime minister of Malaysia, Tun Dr. Mahathir Mohamad at the Perdana Leadership Foundation in Putrajaya.

Nanovon™Ã¯Â¸Â, Voneco's continuous anti-microbial disinfectant nano-coating safeguards businesses & their premises, while complementing the global efforts that vaccine bodies are rolling out. Unlike disinfectant products which only kill pathogens for a short period of time, Nanovon™Ã¯Â¸Â has been proven to have a lasting effect up to 365 days on surfaces with an unprecedented 30-seconds kill time.

"This unique product, Nanovon™Ã¯Â¸Â is the contribution of Malaysia towards the international fight against the coronavirus pandemic. It complements vaccines that have already been developed or are in the process of being developed. We believe the simultaneous use of vaccines together with Nanovon™Ã¯Â¸Â for long-term anti-microbial disinfection of surrounding environments will definitely escalate the level of protection of humanity against viral illnesses," said H.E. Ardasher Saeedjaafar Qodiri, Ambassador & Plenipotentiary of the Republic of Tajikistan to Malaysia.

H.E Naiyl M. Latypov, the ambassador of the Russian Federation to Malaysia spoke of how there is a synergy between Malaysia and Russia at this crucial stage of the global pandemic, particularly in context to how the vaccines & nano-coatings will complement one another in the months to come.

"We hope that today's presentation and demonstration will enable a strategic pathway into Qatar, Russia, and Central Asia. Global events like the upcoming FIFA World Cup in 2022 hosted by Qatar can benefit tremendously from Nanovon™Ã¯Â¸Â in comparison to traditional sanitisation offerings," said Dr. Rayyan Eshaghpour, Director of Voneco Sdn. Bhd.

Voneco's Nanovon™Ã¯Â¸Â• is a globally benchmarked, nano-coating, with a self-disinfecting capability for up to 365 days on surfaces, surpassing stringent international certifications with regards to a full spectrum of viruses & bacteria.
