Avantor receives recognition for helping transform biologics production

April 6, 2021 | News

Named Best Bioprocessing Supplier in Single-Use Manufacturing at the Asia-Pacific Bioprocessing Excellence Awards 2021

Avantor Inc., a leading global provider of mission-critical products and services to customers in the life sciences, advanced technologies and applied materials industries, was named Best Bioprocessing Supplier in Single-Use Manufacturing at the Asia-Pacific Bioprocessing Excellence Awards 2021 held recently.

The award recognizes Avantor's contributions in facilitating biomanufacturing excellence with enhanced speed, reduced cost and superior quality, and reaffirms its critical role in biomanufacturing of biologics. Avantor was also awarded Best Company in Bioprocessing Excellence for Single-use Solutions at Biologics Manufacturing Korea 2020.

Narayana Rao Rapolu, Vice President, Biopharma Asia Middle East & Africa for the Company said, "Avantor has long been an open-architecture, single-use provider, offering complete design, manufacturing and logistics to support every stage of the biomanufacturing process. Our work in biopharma has never been more important. From the small-scale bench, to pilot plant and full commercial manufacturing, we enable our customers to reach the market with new treatments for patients - faster, safer and smarter."
