High Purity New EnglandÃ?Â expands distribution toÃ?Â Northern CaliforniaÃ?Â with Optimal Biotech

April 7, 2021 | News

Accelerates process at drug innovation, drug discovery and development, manufacturing and distribution

High Purity New England, a leading supplier of single-use solutions for the biopharmaceutical industry announced that they have partnered with Optimal Biotech, for distribution of their products in Northern California and the Pacific Northwest. Optimal Biotech will supply custom single-use assemblies, smart pumps, glucose & lactate sensors, sterile individually packaged components, as well as single-use mixers.

Based in Belmont, California, Optimal Biotech strives to make process measurement solutions integrate seamlessly with research & development, pilot, and manufacturing operations to help biopharma companies. Optimal Biotech is commited to creating solutions for their customers bioprocesses closely align with the values that HPNE has been built on.

HPNE continues to supply the biopharma and biotech industries with a range of innovative products, from drug discovery and development to fill-finish, including their flagship product, custom single-use assemblies, as well as pumps, mixers, and other single-use solutions. Along with their own manufactured products for the global market, they are a distributor for 18 brands in North America. HPNE proudly supports numerous companies working on vaccines and therapeutics in the fight against COVID-19.
