

Taiwan sets virtual platform to showcase innovative smart healthcare solutions

03 June 2021 | News

TAITRA organizes an online event to explore innovative smart healthcare solutions in Taiwan's clinical area on 22 June

Taiwan possesses the comprehensive industry chains of ICT, precision machinery leveraging electric medical device solutions and OEM/ODM services. The country has sufficient hospital facilities to carry out clinical trials, which has strengthened Taiwan's biotech and medical industry. These factors have ensured our capability to work with global partners to deliver smart innovative medical devices.

To enhance international healthcare cooperation, the Taiwan External Trade Development Council (TAITRA) is organizing an online event, *'Taiwan Smart Healthcare Solutions Online Presentation and Biz Meeting'*.

The event will gather six leading medical IT solution providers to demonstrate the features and advantages of their products, which is especially crucial in such a demanding clinical area.

1. Telehealth Solutions ([ADVANTECH CO., LTD.](#))

Grab-to-go devices can be assisted with a wide range of medical peripherals to provide real-time access to physicians for diagnosis and assessment.

2. Patient monitoring system ([COGNITO HEALTH INC.](#))

Using predictive algorithms and provide a data-driven approach to improve patient safety, including a range of medical issues from fall incidents to pressure injuries.

3. Medical imaging APP ([EBM TECHNOLOGIES INC.](#))

An iOS-based, FDA class-II cleared medical imaging display solution for data storage, processing, sharing, and even advanced visualization in healthcare centers and clinics.

4. Surgical navigation system ([EPED INC.](#))

Uses precise optical space location technology to create highly compatible navigation for neurosurgery, plastic, oral, maxillofacial, and other minimally invasive surgeries.

5. Mobility aid ([WISTRON MEDICAL TECHNOLOGY](#))

A transformable scooter that can easily switch between driving/strolling modes and assist forces according to different environments, acting as an intelligent safeguard for disabled individuals.

6. ICU device and information integrated solution ([IMEDTAC CO., LTD.](#)) A turnkey IoMT solution that can connect with over 250 equipment as well as offer centralized monitoring and data collecting through a quick view dashboard to eliminate boundaries of different protocols and systems.

Last but not least, an online biz meeting will be held two weeks after the presentation on July 6th which will allow you to engage in direct discussions with Taiwan suppliers and figure out new solutions together for your healthcare business.

The [COVID-19 pandemic](#) has created an urgent need for access to medical devices and health products. This includes especially advanced and innovative solutions using ICT technology like AI and big data, which are used more widely to not only mitigate and prevent contagious diseases but also improve the efficiency of medical resources management. ICT-oriented medical applications like telemedicine, precision medical, real-time monitoring and data analyzing are going to take an increasingly important place in the mainstream of the international healthcare market.

TAITRA sincerely welcomes you to attend our free online presentation and biz meeting!
