Shimadzu launches world's first of its kind lab business intelligence application

June 24, 2021 | News

LabSolutions BiX, a comprehensive web-based application provides users with accurate and timely laboratory analytics from flexible locations

Shimadzu (Asia Pacific)'s Software Development Centre (SDC) in Singapore has launched words-first comprehensive web-based application which can provide users with accurate and timely laboratory analytics, from a laboratory, at home or from a remote location around the world.

The Analytically Intelligent LabSolutions BiX collects data from all kinds of Analytical instruments, processes the data Analytically or logically, and showcases the analyzed output into various Analytics dashboard reports. LabSolutions BiX laboratory Business Intelligence application makes informed decisions based on detailed and critical analysis of the productivity and efficiency of all assets in the laboratory, be it instruments or the people operating them.

LabSolutions BiX is designed for efficient usage by lab chemists, managers, senior management and / or CXOs. Its Brilliant Graphical User Interface (GUI) enriches the total laboratory experience of one and all. It also provides detailed analytics on the instrument and user efficiency in the lab. Its expandable modules and ability to connect to a diverse range of instruments allow the users to spread their Enterprise Digital Footprint.

Core Competencies, Unique Features & Benefits

Brilliant - A brilliant experience to enrich your laboratory

- Web-based Application - Work from Home or anywhere in the world using any smart device (iOS or Android, Mac or PC).
- Interactive GUI - Multi-tasking and Ease of Use for even the most non-technical users.
- Dashboard Specific Reports & Interactive Product Tour – Provides enhanced user experience.

illume - Illuminate greater possibilities of your lab's performance with accurate analytics

- Detailed Accurate Analytics - on Instruments, Users, Samples, Batches, Projects, Injections etc.
- Audit Review function - Face regulatory challenges with confidence.
- Real-time Notifications & Messages - Stay on top of the most important tasks.

eXpanse - Expand the digital footprint of your laboratories

- Expandable Modules - Helps enhance your existing LabSolutions network.
- Scale-up - Connect diverse instruments and software to your existing network.
- Expand your Enterprise Digital Footprint - Connect your analytics to multiple labs and locations.
