Nippon Express establishes new pharma-medical logistics base in Taiwan (Taoyuan City)

September 17, 2021 | News

A storage/work area compliant with GDP/GMP standards for pharmaceuticals, medical devices, and cosmetics

Nippon Express (Taiwan) Co., Ltd., a local subsidiary of Nippon Express Co., Ltd., established a new logistics base (NEXT3 Warehouse) in Taoyuan City in northern Taiwan and obtained business licenses for cosmetics, pharmaceuticals, and medical equipment at the end of July.

The newly established NEXT3 Warehouse takes advantage of its proximity to large urban areas to handle retail and EC-related products, and its integrated operation with the adjacent NEXT2 Warehouse, which has a bonded area, makes it possible to flexibly store both bonded and non-bonded cargo.

A storage/work area compliant with GDP/GMP standards for pharmaceuticals, medical devices, and cosmetics has also been set up, and an application for certification by the Taiwan Food and Drug Administration (TFDA) is currently being processed. The warehouse will be providing high-quality storage and distribution processing services through proper product management.

NE Taiwan will be adding to its international transport services utilizing the Nippon Express Group's global network by further expanding its logistics functions across Taiwan to help customers develop their business activities.
