Malaysia's private healthcare sector steps up for digital transformation

October 21, 2021 | News

UNO Technologies announces collaboration with Aetos Pharma in Malaysia

UNO Technologies, a rapidly growing Medical Technology firm based in Singapore, has recently announced its expansion into the Malaysian market. As part of its regional strategy, UNO will team up with Malaysian startup Aetos Pharma to jointly propel the digital transformation of Malaysia's private healthcare sector.

The Malaysian startup and tech ecosystem is at the cusp of a new wave of innovation with increased interest by global VCs and tech giants. This is further bolstered by the Government's national 'MyDigital' initiative which aims to transform the country into a digitally-driven, high-income nation and a regional leader in the digital economy.

As part of UNO Technologies' Malaysian expansion plan, the UNO Clinic Management System (UNO CMS) will be the first product available to medical practitioners and businesses. UNO CMS is an end-to-end platform digitizing clinical and operational workflows. The solution provides accurate, up-to-date and actionable data to help physicians, clinics and individuals take smarter decisions.
