Data Science and Artificial Intelligence Lab opens in Singapore

November 1, 2021 | News

To expose students to invaluable real-world machine learning and deep learning application

AMD and Nanyang Technological University, Singapore (NTU Singapore), with the support of the Singapore Economic Development Board (EDB) have announced the official opening of the NTU-AMD Data Science and Artificial Intelligence (DS&AI) Lab.

With a dedicated goal of nurturing the next generation of globally-competitive tech leaders and innovators, AMD and NTU's synergised efforts will augment local DS&AI education, equipping students with the tech tools and skills needed to inspire a better future.

In line with Singapore's efforts to build a thriving AI ecosystem, the NTU-AMD DS&AI Lab will combine AMD's leading-edge deep-learning technology and NTU's global strengths in machine learning, AI and data science, enabling local DS&AI talent to pioneer the development of impactful AI solutions in key sectors.

This initiative also aims to support the AI Singapore programme and the nation's transition to Industry 4.0
