

## Data Science and Artificial Intelligence Lab opens in Singapore

01 November 2021 | News

**To expose students to invaluable real-world machine learning and deep learning application**

AMD and Nanyang Technological University, Singapore (NTU Singapore), with the support of the Singapore Economic Development Board (EDB) have announced the official opening of the NTU-AMD Data Science and Artificial Intelligence (DS&AI) Lab.

With a dedicated goal of nurturing the next generation of globally-competitive tech leaders and innovators, AMD and NTU's synergised efforts will augment local DS&AI education, equipping students with the tech tools and skills needed to inspire a better future.

In line with Singapore's efforts to build a thriving AI ecosystem, the NTU-AMD DS&AI Lab will combine AMD's leading-edge deep-learning technology and NTU's global strengths in machine learning, AI and data science, enabling local DS&AI talent to pioneer the development of impactful AI solutions in key sectors.

This initiative also aims to support the AI Singapore programme and the nation's transition to Industry 4.0
