EVERSANA expands service across Asia Pacific region

July 13, 2022 | News

EVERSANA partners with Compai Pharma to expand commercialisation services across the Asia Pacific region

EVERSANA, a pioneer of next-generation commercial services to the global life sciences industry with its Asian regional headquarters in Singapore and offices across Japan, China and other countries in the area, and Compai Pharma, an enterprising pharmaceutical company offering full-service commercialisation with offices in Singapore and Malaysia, have announced a strategic partnership to expand service across the Asia Pacific region.

Together, EVERSANA and Compai Pharma will provide medical and commercial resources to healthcare partners to support full market implementation and development for life science and pharmaceutical companies ready to expand into these markets.

The partnership with Compai builds on EVERSANA's continued global growth, including recent expansion across the European Union and the United Kingdom. Additionally in June 2021, EVERSANA announced the growth of its medical communications and integrated compliance services across 18 European countries and in 10 local languages.
