

Singapore's Claritas HealthTech announces India operations focusing on AI assisted diagnostic tools

22 November 2022 | News

Introducing its suite of AI diagnostic tools to meet the demand from the Indian health sector

Singapore based Claritas HealthTech, a healthcare technology company specialising in advanced medical image enhancement and artificial intelligence (AI) assisted diagnostic tools to aid and optimise the diagnostic workflow of clinicians, has selected Bengaluru in Karnataka as its base for its Indian business headquarters.

With an established presence in Singapore and a successful entry into the UK market, Claritas has selected Bengaluru as its base for India, to meet the vast and rapidly growing medical diagnostic requirements of the country.

Chetan Baxi, Co-founder, and Director of Claritas, commented, "In the last two quarters this year, we have had strong demand from India for our technology that aids clinicians to interpret medical images with greater accuracy and efficiency. To meet this demand, and given the favourable market conditions, we have opted to establish an India unit dedicated to serving the Indian market. We expect these operations to commence by January 2023."

As part of its global deployment initiative, Claritas will introduce its suite of products, including, iRAD for radiology image enhancement, iPET for PET and PET-CT/MRI accelerated acquisition and enhancement, and its suite of AI diagnostic tools, to meet the demand from the Indian health sector.
