Singapore welcomes first integrated private cancer centre for comprehensive cancer care

January 11, 2023 | News

Icon Cancer Centre partners with Mount Alvernia Hospital with a commitment of S$28 million to provide state-of-the-art facility in medical oncology, surgical oncology, and radiation oncology services in Singapore

Australia's largest dedicated provider of cancer care and part of Icon Group, Icon Cancer Centre Singapore, has launched first ever integrated private cancer centre in Singpaore. The state-of-the-art facility in partnership with Mount Alvernia Hospital will provide a comprehensive range of medical specialties and services to care for cancer patients holistically, all under one roof.

The centre signifies a S$28m commitment from Icon and Mt Alvernia to expanding holistic cancer services for patients in Singapore and across the region.

"we commit to provide cancer patients with the full continuum of care through a one-stop end-to-end treatment including the PET-CT scan, medical oncology, radiation oncology, haematology treatments and surgery in Mount Alvernia Hospital" Dr James Lam, Chief Executive Officer, Mount Alvernia Hospital.

Comprehensive treatments and tailored cancer care includes Radiation Therapy Treatment, Nuclear Medicine and PET-CT, Chemotherapy treatment and compounding.

The center is thriving to elevate cancer care through theranostics with Quantum Pharma Singapore while developing novel cancer treatments and keeping it accessible with Icon Cancer Foundation.

Icon Cancer Centre has partnered homegrown financial services company Singlife to provide more accessible and sustainable cancer treatments and services, so that they can focus on recovery.

Icon and Singlife have signed a memorandum of understanding to explore further collaboration to bring greater affordability to customers, as guided by the cancer treatment and service guidelines released by the Ministry of Health.
