Thailand opens world-class institute to treat all heart conditions

March 15, 2023 | News

The institute has become a tertiary referral centre for the Asia pacific region

Artirat Charukitpipat, Chief Executive Officer of Bumrungrad International Hospital; Associate Professor Dr Taveesin Tanprayoon, Chief Medical Officer of Bumrungrad International Hospital; and Professor Dr Koonlawee Nademanee, Cardiologist, Electrophysiologist and Director of the Bumrungrad Heart Institute in Thailand have led the medical team to launch its world-class heart institute to research, invent, and develop innovative and clinically effective techniques to treat all heart conditions.

The institute specialises in treating coronary artery diseases, arrhythmia, advanced heart failure and heart transplantation, structural heart disease, cardiogenetics, and congenital heart disease.

It will also deliver cardiac screening and preventive care. Bumrungrad Heart Institute has achieved its goals and success in delivering truly world-class care while striving to maintain the best patient satisfaction.

“We aim to be a state-of-the-art medical facility in all areas of cardiology, including coronary artery disease, arrhythmia, advanced heart failure and heart transplantation, structural heart disease, cardiogenetics, congenital heart disease, cardiac screening, and preventive care. We are also equipped with a cardiac care unit, which provides 24-hour care for cardiac patients requiring acute care or post operative recovery to enable them to return to the best of their ability as soon as possible”, said Prof. Dr Koonlawee Nademanee.
