

LogiPharma to launch life sciences supply chain conference summit in Singapore (June 2023)

28 March 2023 | Company results

The global life sciences supply chain conference brand will be holding its inaugural Asian summit on June 20 and 21 this year

LogiPharma, the global life sciences supply chain conference brand will be holding its inaugural Asian summit from June 20 - 21, 2023 at the Equarius Hotel in Sentosa, Singapore. This will be the first opportunity for Asia's senior supply chain, operations and logistics executives to find answers to ongoing challenges and implement solutions to create a more nimble, resilient, and transparent supply chain.

With the presence of over 150 attendees and more than 50 speakers from leading regional and international brands, LogiPharma Asia 2023 is bringing the challenges of supply chain leaders into the spotlight. The summit encompasses multiple verticals, spanning from pharmaceuticals, biotech, life sciences, and the Healthcare sector to ensure an unbiased and comprehensive view on the future of the function.

Attendees will not only get to connect and build meaningful relationships with leaders who are at the forefront of supply chain, but also get exposure to the latest technologies and innovations through success stories, interactive case study panels, country clinics, peer led roundtables, and more.

2023 will see heavy discussions on how to:

- Thrive in the face of shrinking profit margins and overcome rising inflation and a bearish economy
- Mitigate and manage risks in a challenging global landscape shaped by geopolitical risks and endless disruptions
- Drive transformation across all parts of the company to enable the supply chain to address more complex product demands, business climate and new regulations
- Tap on the latest state-of-the-art innovations to drive efficiency and bring you ever closer to the patient
- Integrate ESG principles into all areas of your supply chain and logistics

As the world continues to be rocked by geopolitical risks, economic downturn and inflationary pressures, it is vital and crucial for the companies to reevaluate supply chain risk management frameworks and accelerate innovation to navigate safely through the business climate.
