Malaysian Genomics inks agreement for expansion into Bangladesh

May 16, 2023 | News

Group to cooperate with Toticell to distribute its products and services

Malaysian Genomics Resource Centre (MGRC) Berhad, a leading genomics and biopharmaceutical specialist, has announced a strategic cooperation agreement (SCA) with Toticell for the distribution of the Group's products in Bangladesh.

Toticell, which is based in Dhaka, Bangladesh, specialises in regenerative healthcare focusing on treatments for musculoskeletal conditions such as arthritis, sports-related injuries and tendinopathies.

Under the SCA, the parties agree to cooperate in the distribution of Malaysian Genomics' cosmeceutical products, genetic screening tests, CAR T-cell therapy services, and other areas of mutual commercial interests.

In April, MGRC announced that the Group has made progress in establishing partnerships following the signing of SCAs with several Dubai, United Arab Emirates parties, namely American Spine Center, a specialist in spinal injury and spine pathology; BALSAM Health Services, a healthcare service provider; Wellness by Design FZ LLC, a nutrition, obesity and weight loss specialist, and IAC International LLC, which is coordinating and developing the partnerships.
