

Bora Pharmaceuticals unveils new facility in Taiwan for manufacturing ophthalmic products

04 August 2023 | News

Access to latest technology to manufacture and package an extensive range of products

Bora Pharmaceuticals, a leading contract development and manufacturing organisation (CDMO), has announced the opening of a new state-of-the-art facility in Taoyuan City, Taiwan.

Officially opened by Bora Pharmaceuticals Chief Executive Officer (CEO) Bobby Sheng and President of Taiwan Operations Tom Chang, the facility will provide Bora's customers with access to an extensive range of ophthalmic manufacturing services.

The 6891m² facility is equipped with the latest technological advancements and will specialise in manufacturing ophthalmic products such as sterile solutions, emulsions, creams, ointments and gels.

Bora's Taoyuan City facility received FDA approval earlier this year and will include two tube and two solutions lines.

Bobby Sheng, CEO of Bora Pharmaceuticals, said: "The average age of adults aged 60+ is expected to double by 2050, and, as a result of the ageing population, we've seen demand for Ophthalmic products skyrocket in markets across the globe. The opening of the new Ophthalmic site marks a significant milestone in our commitment to deliver excellence for our clients and providing services that are high in demand. Since the site launched, we have received numerous requests from new clients who are particularly interested in our Ophthalmic service."
