Remedi introduces affordable & innovative handheld X-ray solution in India

September 18, 2023 | News

Unveils REMEX KA-6, a game-changing addition to the medical field

Remedi, a leading Korean research & radiology device company with cutting-edge products known for its expertise in radiology solutions, has unveiled REMEX KA-6, a game-changing addition to the medical field. This best-in-class, affordable, and innovative handheld X-ray device is not only low-dose but also lightweight, making it the perfect tool for quick and accurate diagnoses.

Rena Lee, CEO, Remedi & Dr Kaushal Mehta, CMO, Remedi expressed their enthusiasm for providing access to Remex KA6 in India, saying, “it is a game-changer in the field of radiology. India being a trade partner to Korea, our objective is to strengthen the healthcare delivery in India and Remex KA6 will play a pivotal role for that. We are in discussion with Invencer health, and soon we will announce our collaboration together.’

Anudesh Goyal, CEO, Invencer Health shared his thoughts on the partnership, saying, “We are excited to join forces with Remedi to launch REMEX KA-6 in India. This revolutionary device aligns perfectly with our mission to provide innovative and accessible healthcare solutions to the India market."

The REMEX KA-6 is a groundbreaking addition to medical imaging, offering high-quality imaging with variable settings, low-dose imaging, and a compact design. Its user-friendliness simplifies area-specific adjustments, it has a wide range of usage starting from healthcare to veterinary to military support. This can be a boon for ICU setting in hospitals, outreach programmes where early detection through community screening is the key, and also it aligns with India's vision to eliminate tuberculosis (TB) by 2025 through community screening.
