Mediwave unveils AI-powered emergency response suite and smart ambulance in Malaysia

November 6, 2023 | News

Enhancing accessibility to cutting-edge screening procedures for breast cancer early detection

Mediwave, an emerging leader in healthcare technology in Singapore, has marked a significant milestone with the introduction of its cutting-edge end-to-end Emergency Response suite and the Smart Connected Ambulance, featuring artificial intelligence (AI) and Mixed Reality technology in Malaysia.

This groundbreaking suite of digital healthcare solutions were unveiled at the Digital Nasional Berhad's (DNB) 5G Experience Centre in Malaysia, underscoring its strategic significance in the healthcare industry and the event was officiated by YB Fahmi Fadzil, Minister of Communications and Digital, Malaysia.

Going beyond the conventional Emergency Response Management Systems (ERMS), Mediwave's healthcare suite integrates Smart EMT (Emergency Medical Technician) and Smart Ambulance technologies, providing real-time guidance to EMTs during pre-hospital emergency treatment.

It leverages the capabilities of Microsoft HoloLens and seamlessly integrates with IoMT devices enabled with HL7 Standard. Furthermore, an AI-powered speech-to-text transcriber streamlines case note creation and automates support for EMTs in Electronic Patient Care Reporting (ePCR).

Reza Aniff, Chief Operating Officer of Mediwave said, "Representing the pioneering industry-ready end-to-end platform of its kind in Southeast Asia, we are set to usher in an era of immersive and scalable digital healthcare that will profoundly enhance lives worldwide."
