Established presence across borders with successful export of diagnostic supplies int Nepal and Bangladesh

With the recent launch of Export Division for diagnostic supplies by LordsMed, the global healthcare division of India-based Lord's Mark Industries is set to export more than 6.55 million diagnostic supplies in SAARC countries.

LordsMed has successfully exported more than 4.55 million diagnostic supplies, with plans to further enhance this figure by an additional 2 million by the end of the current month. The company aims to establish itself as a leading global player in In-Vitro Diagnostics (IVD) manufacturing and export market.

Lords Med has successfully built a vast network of over 300 distributor channels across India. The manufacturing facilities located in the outskirts of Mumbai, India currently has the capacity to facilitate more than 1.7 crore diagnostic tests per month, covering a wide range of specialties including biochemistry, haematology, serology, rapid tests, and urine strip tests.

Manav Teli, Executive Director, Lord's Mark Industries said, "We are thrilled to announce our presence across borders with successful export of diagnostic supplies int Nepal and Bangladesh. Our goal has always been to emerge as a global leader in IVD manufacturing and export, providing top-quality solutions at an affordable cost. With our advanced manufacturing facilities and extensive distributor network, we are now expanding our reach to neighbouring countries."
