STARLIMS and INFOCOM launch partnership in Japan.

March 19, 2024 | News

STARLIMS and INFOCOM are pleased to announce they have entered into a strategic partnership. They are combining INFOCOM's comprehensive presence in the business solutions space and their in-depth understanding of the industries with STARLIMS' Informatics technology and solutions to grow the market in Japan.

Founded in 1983, Infocom Corporation is a well-established publicly traded company engaged in the provision of IT solutions and information communication services. It operates through the business solution group and digital entertainment group segment. Under the business solution group segment, it provides self-developed software products such as CRM, PACS, research tools, ERP and emergency confirmation systems for corporations, hospitals, and public institutions.

STARLIMS, with over 36 years of industry experience, knows how to take the complexity out of managing quality initiatives by helping customers drive more revenue faster, achieve and maintain a manageable cost base, and reach their compliance objectives so customers can focus on what really matters – getting products to market faster.

We are very excited about the INFOCOM partnership with STARLIMS. This partnership will allow us to better serve the customers in Japan as well as extend STARLIMS' footprint in the region.

Trey Cook

STARLIMS CEO

Together, INFOCOM and STARLIMS will offer a comprehensive set of solutions for the industry covering the entire lifecycle of operations. These comprehensive solutions will enable a growth path and quicker time to value for the customers while enhancing their experience.
