

DNA Health & Wellness set to expand into Abu Dhabi

19 June 2024 | News

The new state-of-the-art clinic will open in Abu Dhabi in the third quarter of 2024

DNA Health & Wellness, the MENA region's first and largest health optimisation and longevity clinic group, is set to open its new clinic in Abu Dhabi in the third quarter of 2024.

The new state-of-the-art facility will span over 10,000 sq. ft and offer a comprehensive range of health optimisation and longevity treatments, incorporating the latest in preventative health and precision medicine tailored to meet the unique and personalised needs of each client.

Located in Central Abu Dhabi, the expansion marks a significant milestone in DNA Health & Wellness' mission to provide cutting-edge health services across the UAE.

Offering the same comprehensive array of treatments as its Dubai clinics, DNA Health & Wellness Abu Dhabi will incorporate innovative technology and focus on four key disciplines: **Prevention** – proactive approach to health designed to detect and prevent health issues and diseases before they arise with the use of detailed blood testing, advanced diagnostic imaging and AI based reporting software; **Optimisation** – precision medicine to target and optimise health using the latest therapies such as peptides, hormonal therapy, exosomes, NAD+, stem cells, and disease reversal programmes; **Rejuvenation** – advanced aesthetic treatments using regenerative medicine such as pure exosomes and stem cells; and **Longevity** – in-depth longevity health screening and biological aging analysis combined with stem cells and DNA repair to help enhance health span and lifespan.
