Apollo Hospitals and Mayapada Healthcare to boost medical excellence in Indonesia

January 26, 2025 | News

Apollo Hospitals will provide management expertise and operational services for Mayapada Healthcare's upcoming hospital in Batam

Apollo Hospitals Enterprise Limited (AHEL), one of Asia's leading integrated healthcare providers, has signed a significant Memorandum of Understanding (MoU) with Mayapada Healthcare Group, Indonesia. The partnership is set to transform the region's healthcare landscape by enhancing medical capabilities, clinical programs, and operational excellence.

The MoU was signed in the esteemed presence of the Minister of Health, Government of Indonesia, Budi Gunadi Sadikin, reaffirming both organizations' commitment to improving healthcare delivery in Indonesia and the surrounding region.

Through this collaboration, Apollo Hospitals will provide management expertise and operational services for Mayapada Healthcare's upcoming hospital in Batam, Indonesia. The agreement also includes the exchange of clinical knowledge and programme development in specialized fields such as oncology, cardiology, neurology, and transplant surgery.

Both organisations will leverage advanced technologies like Tele-Radiology, E-ICU, and Artificial Intelligence (AI) programs to enhance patient care and accessibility. Training programmes for doctors and nurses will focus on evidence-based practices, specialised care, and advanced medical techniques. Apollo Hospitals plans to deploy up to 1,000 specialists, including doctors, nurses, and technicians, to support Mayapada Healthcare's facilities.

The collaboration will also promote online education for healthcare professionals through Apollo's Medvarsity platform and initiate a Double Degree Nursing Programme, providing Indonesian healthcare professionals with global exposure. Additionally, Mayapada Healthcare and Apollo Hospitals will jointly conduct Continuing Medical Education (CME) programs and host international healthcare events to foster professional development.
