ValGenesis and Hitachi join forces to digitally transform Japan's life sciences sector

February 5, 2025 | News

To accelerate time to market with the most advanced digital validation platform in the industry

US-based ValGenesis Inc., the global leader in enterprise validation lifecycle management systems (VLMS), and Hitachi Industry & Control Solutions, have announced a strategic partnership aimed at transforming Japan's life sciences companies through innovative digital validation solutions.

This collaboration unites ValGenesis' industry-leading digital validation platform with Hitachi Industry & Control Solutions' extensive experience and reach in Japan, empowering companies to accelerate drug development, enhance regulatory compliance, and deliver improved patient outcomes.

ValGenesis and Hitachi Industry & Control Solutions bring together a powerful blend of technological prowess, innovative solutions, and a global reach. This partnership delivers a comprehensive, future-ready digital transformation solution designed to meet the life sciences industry's evolving needs in Japan. Hitachi Industry & Control Solutions' established expertise in Japan's life sciences sector, together with its strengths in IT systems, equipment, and validation services, perfectly complements ValGenesis' leading-edge validation platform, creating an unparalleled solution that will drive value for life sciences organisations at every stage.

Through this collaboration, Hitachi Industry & Control Solutions will leverage ValGenesis VLMS, the leading digital validation platform for life sciences, to optimise validation processes for Japanese companies. Together, they aim to accelerate the development and delivery of safe, effective healthcare solutions that meet the highest standards in quality and regulatory compliance.
