Siemens Healthineers and Singapore's SGH partners to advance medical diagnostics innovation

April 9, 2025 | News

Five-year strategic partnership to improve patient care and to creates valuable opportunities for mutual knowledge exchange between Siemens Healthineers and SGH.

A/Prof Andrew Tan of SGH, Dr Jochen Schimtz of Siemens Healthineers, A/Prof Ruban Poopalalingam of SGH, and Enno Nehrbass of Siemens Healthineers signed the MOU pledge in Siemens Healthineers HQ Erlangen, Germany.

Siemens Healthineers and Singapore General Hospital (SGH) have recently signed a Memorandum of Understanding (MOU) to establish a five-year strategic partnership to advance healthcare solutions and support SGH in medical innovation. Working together, the two organizations aim to strengthen Singapore's healthcare ecosystem by driving continuous learning, innovation, and excellence in patient care.

The MOU, signed at the Siemens Healthineers headquarters in Erlangen, Germany, focuses on improving patient care by developing new technologies, clinical solutions, and data-driven approaches to enhance diagnostics and treatment protocols. The collaboration emphasizes hands-on training, workshops, and knowledge-sharing initiatives to build expertise and capacity, while also laying the foundation for future advancements in AI-driven diagnostics, digital health solutions, and sustainability initiatives.

Ms Siow Ai Li, Managing Director, Siemens Healthineers Singapore and Malaysia. "Collaboration is key to advancing healthcare. By co-developing new clinical solutions and leveraging our expertise, we are committed to supporting SGH and the broader Singapore healthcare landscape in pioneering future-ready innovations."

This strategic partnership is built on these key pillars:

- **Clinical Research and Collaboration** – Siemens Healthineers and SGH aim to develop new technologies, clinical solutions and data-driven approaches to enhance diagnostic and treatment capabilities and protocols. This collaboration aims to foster innovation and improve patient care through joint research initiatives and clinical trials.
- **Education and Training** - Siemens Healthineers is committed to supporting SGH with the latest knowledge and skills. Through partnering with SGH for hands-on training, workshops, and knowledge-sharing initiatives, this partnership will build expertise and capacity to deliver better patient care.

- **Future-ready Healthcare:** The partnership will lay the foundation for future collaboration in areas such as AI-driven diagnostics, digital health solutions, and sustainability initiatives. By leveraging advanced technologies, SGH and Siemens Healthineers aim to stay at the forefront of medical innovation.

By sharing best practices and expertise, both parties can co-develop innovative solutions that address evolving healthcare challenges. Siemens Healthiners aims to support SGH's medical professionals with our innovative services and insights, while SGH's clinical expertise and real-world experience will help refine and advance cutting-edge medical technologies.
