Vinmec Can Gio International General Hospital to open in Vietnam

April 29, 2025 | News

Cleveland Clinic will serve as a strategic advisor to Vinmec Healthcare System

Cleveland Clinic and Vingroup are collaborating to develop the future Vinmec Can Gio International General Hospital based on the Cleveland Clinic model of care, with groundbreaking set for August.

Vinmec Healthcare System, owned by Vingroup, is a non-profit healthcare system dedicated to improving healthcare quality in Vietnam. It currently operates nine hospitals and four clinics in Vietnam.

Vinmec Can Gio will inherit the high international standards of the Vinmec Healthcare System. The new hospital will be planned and constructed from the ground up based on the Cleveland Clinic model of care, integrating comprehensive specialties, advanced clinical centers, and world-class medical equipment.

The new hospital will be located within the Vinhomes Green Paradise, a nearly 7,500-acre world-class coastal township developed by Vingroup in Long Hoa Commune, Can Gio District, Ho Chi Min City township.

This early-stage collaboration ensures that Vinmec Can Gio will emerge as a comprehensive, patient-centered international hospital that meets the world's highest standards in healthcare.

Vinmec Can Gio's core medical and operational teams will have access to Cleveland Clinic's advisory services, education, and training. The program for clinicians and nurses will include advanced training in a clinical setting. The hospital's leadership team will have access to observational opportunities and an in-depth exchange programme.

In addition, Vietnamese and international patients of Vinmec Can Gio will have access to Cleveland Clinic's best practices for clinical care. When necessary, those patients may be referred to Cleveland Clinic hospitals in the US.
