

Zyla's digital therapy solution in global markets has been shown to exhibit high patient adherence and significant health outcomes. On average, onboarded patients spend 12 minutes per day actively interacting with the app, a testament to strong adoption and ongoing interaction. Interestingly, 75% of patients remain active with the platform into their second quarter of care, above even India's retention rates. In addition, 50%+ users have indicated significant symptom improvement, highlighting the power of Zyla's tailored, AI-driven model of care.
