Singapore: Singapore based healthcare technology and services provide Napier Healthcare has appointed Mr Sahel Mattar as vice president of global consulting and services taking charge of strategy, consultation, professional services and implementation of Napier's Healthcare information technology solutions to healthcare providers around the world.

"It is a privilege to join Napier Healthcare, an innovative company that brings together the best medical informatics professionals with deep domain knowledge and experience in the healthcare industry," said Mr Sahel on his new appointment. He added, "Today is a turbulent time for the healthcare landscape as major shifts are evolving across the globe. As a team, we are committed to help providers transform their business with innovative care delivery models to achieve the highest quality care possible at the lowest possible cost."

Prior to joining Napier Healthcare, Mr Sahel was Head of SAP Services for HCL AXON where he was responsible for managing the SAP line of business and services delivery function.

"We are excited to have Mr Sahel join the leadership team. He will lead Napier's strategic initiative to transform the consulting arm as our business expands across the globe. His leadership and experience will help create value for customers and enable Napier's customers to learn from best practices across hospitals worldwide," said Mr Tirupathi Karthik, CEO, Napier Healthcare.
