

RapidAI and Health Holdings Company join hands to bring deep clinical AI to Saudi Arabia

13 November 2025 | News

Advancing Saudi Arabia's Vision 2030 initiative to drive healthcare innovation and digital transformation

RapidAI, the pioneer of deep clinical AI and global leader in intelligent imaging and workflow integration, has announced a strategic partnership and co-development with Saudi Health Holdings Company (HHC), the largest healthcare provider in the Middle East.

Through this collaboration, RapidAI will serve as HHC's enterprise provider of deep clinical AI across its 20 health clusters network of hospitals and clinics, supporting multiple disease states in neurology, cardiology, vascular, oncology, orthopedic and beyond.

Built on the Rapid Enterprise™ Platform and driven by RapidAI's deep clinical AI, underpinned by advanced foundation models trained on multimodal clinical data and advanced 3D visualisation, this collaboration brings a new level of adaptability and intelligence to healthcare systems globally.

By integrating imaging, reports, and structured clinical data, Rapid's deep clinical AI is developed from real-world patient cases, enabling clinicians to make faster, more informed decisions while laying the groundwork for scalable, data-driven innovation across the entire healthcare system.
