Asia Pacific's biomanufacturing landscape is entering a defining decade, and the inaugural **APAC Biomanufacturing Leadership Summit 2026** is set to become the region's most influential gathering for leaders shaping this growth. Hosted by Charles River, the one-day forum will convene senior decision makers, investors, regulators, and scientific innovators at Marina Bay Sands Singapore on **10 March 2026**.

Designed as a high calibre, invitation-driven platform, the Summit places emphasis on meaningful dialogue, purposeful networking, and executive level insight-sharing. In an era where the region is rapidly becoming a global force in biologics manufacturing, this exclusive forum aims to accelerate strategic thinking, strengthen cross-border partnerships, and explore pathways to elevate APAC's scientific and commercial influence.

A Strategic Forum for Regional Ambition and Global Impact

The Summit will spotlight breakthrough thinking across biomanufacturing, quality and regulatory pathways, advanced biologics testing, partnership development, and market expansion. Delegates can expect deep-dive sessions led by APAC's foremost experts, covering themes such as:

- Regulatory clarity for accelerated biomanufacturing scale-up
- Next-generation modalities and innovations in biologics testing
- CMC preparedness for international market entry
- Investment priorities shaping the future of APAC's biologics ecosystem
- Collaboration strategies across CDMOs, innovators, and global partners

By bringing together leaders who directly influence policy, pipelines, and partnerships, the Summit provides a focused environment where ideas move from conversation to action.

Curated Exclusively for Senior Leadership

Attendance is limited to a senior, pre-vetted audience to ensure productive exchanges and strategic alignment. The Summit welcomes:

- C-suite executives, board members, and senior directors from biopharma, biotech, and CDMOs
- Heads of manufacturing, quality, regulatory, and process development
- Investors, venture partners, and growth advisors
- Consultants and scientific strategists guiding biomanufacturing evolution

This carefully selected group promises a forum where every discussion matters and every connection carries long-term value.

A Distinctive Networking and Knowledge Experience

Delegates will have opportunities to:

Discover fresh insights from APAC's biomanufacturing leaders through keynote sessions and panel discussions.

Acquire actionable strategies for regulatory alignment, partnership models, and investment readiness.

Network with global regulators, industry pioneers, and potential collaborators during dedicated networking hours.
