

Dubai Health and Johnson & Johnson MedTech sign MoU to advance healthcare innovation

27 February 2026 | News

Establishing a collaborative framework to advance professional education

Dubai Health and Johnson & Johnson MedTech have signed a Memorandum of Understanding (MoU) establishing a collaborative framework to advance professional education, drive sustainability initiatives, and support digital innovation in healthcare.

The MoU was signed by Dr Hanan Al Suwaidi, Deputy CEO and Chief Academic Officer of Dubai Health and Provost of Mohammed Bin Rashid University of Medicine and Health Sciences (MBRU), and Prosun Niyogi, Vice President and General Manager, Surgery Emerging Markets representing Johnson & Johnson MedTech. The signing was attended by Dr Tarek Fathey, Chief Clinical Officer at Dubai Health.

The collaboration is structured around three core pillars. The first focuses on professional education and capacity building through tailored training programs and train-the-trainer initiatives. The second advances sustainable development by expanding recycling programmes across selected hospitals. The third supports the implementation of digital ecosystems that enable surgical video capture, secure content sharing, collaborative case planning, and telepresence-enabled remote collaboration and education.
