

Abu Dhabi's government partners with Sanofi to advance vaccine innovation

June 23, 2026 | News

The planned Vaccine Innovation Centre is expected to strengthen Abu Dhabi's contribution to global health security

The Department of Health – Abu Dhabi (DoH), the regulator of the healthcare sector in Abu Dhabi, and Sanofi, a worldwide biopharma and vaccines leader, have signed an Memorandum of Understanding and intend to enter into an agreement to advance their partnership in vaccine innovation and to jointly explore the development of a Vaccine Innovation Centre in Abu Dhabi.

The collaboration would strengthen capabilities across AI-enabled vaccine discovery, mRNA research, clinical development and manufacturing, and support regional and global preparedness for future public health challenges.

Operating within Abu Dhabi's Health, Endurance, Longevity, and Medicine (HELM) Cluster, the collaboration intends to bring together scientific research, clinical infrastructure, academic expertise, enabling regulation and advanced manufacturing within a single ecosystem.

The planned Vaccine Innovation Centre is expected to strengthen Abu Dhabi's contribution to global health security while supporting the development of local scientific talent, advanced manufacturing capabilities and next-generation vaccine innovation. Through the advancement of vaccine research, development and manufacturing capabilities in the region, the centre will help expand access to advanced vaccines and strengthen preparedness for future public health challenges.
