American Hospital Dubai and Abbott sign MoU to bring first next-gen early cancer-detection technology to UAE

August 14, 2026 | News

American Hospital Dubai first to introduce advanced solutions for early-stage cancer detection

American Hospital Dubai, a regional leader in benchmark healthcare and innovative medical solutions, has signed a Memorandum of Understanding (MoU) with global healthcare leader Abbott to promote the advancement of innovative early cancer detection capabilities in the UAE.

The advanced early detection technologies will exponentially elevate the country's diagnostic excellence, enabling individuals to benefit from innovative solutions. American Hospital is the first private healthcare entity in Dubai to introduce such an advanced early-stage cancer detection solution.

The collaboration reiterates the shared vision, values and commitment of the two leading entities transforming healthcare to deliver the most advanced healthcare solutions to people.

Early cancer detection is critical to improving cancer care and management, and the introduction of these advanced, high-level early detection technologies is a significant advantage for the UAE. It will enable the country to fast-track its national cancer care objectives, including reducing cancer mortality through early detection.
