

BD launches Cell Analyzer to enhance drug discovery

11 July 2013 | News | By BioSpectrum Bureau

Singapore: BD Biosciences, a global medical technology company, has launched BD LSRFortessa X-20 Cell Analyzer, to deliver high-performance multicolor analysis with compact footprint in its class at just 30" x 29" (76.2 X 73.7 cm) and a height of 30" (76.2 cm).

BD LSRFortessa X-20 Cell Analyzer is designed to configure BD flow cytometers and cell sorters to fit precise research and assay needs. The program is tailored to meet the needs of researchers at the leading edge of biomedical discovery.

"The new BD LSRFortessa X-20 Cell Analyzer will enable researchers to conduct complex experiments with the additional parameters and increased sensitivity they need," said Mr. Alberto Mas, President, BD Biosciences. "Uncovering dim staining and rare cell populations is extremely valuable to complex multicolor assays, which are tools for advanced disease or drug development research," he stated.
