

Aurionpro's SCMProFit suite - a huge success:SFS

24 April 2014 | News | By BioSpectrum Bureau

Singapore: Singapore based SFS Pharma Logistics registered its first success in global supply chain management platform by going live with Aurionpro's SCMProFit suite in six countries. SFS provides logistic operations to manage efficient product delivery to their global customers.

SCMProFit ensured strict adherence to standard operating practices and effective control in delivery of chilled and frozen, clinical trials, pharmaceuticals and other time and temperature sensitive products.

Based in Singapore, SFS operates in twenty five countries across Asia Pacific, Europe, Africa, and North America, providing transportation services for time and temperature sensitive pharmaceutical shipments.

Mr Roger Chew, SFS's Global Sales director, said that SCMProFit was the clear choice to handle the firm's complex logistic operations in supply chain management and drug delivery mechanism. He further added that this would be an ideal globally-scalable solution to improve the operation efficiency, while adhering to strict operational protocols and industry regulations.

Aurionpro's Sr vice president of Sales, Mr Dhananjay Jadhav congratulated SFS on its maiden success with the SCMProFit and added the company was looking forward for a long lasting partnership with SFS in order to globalize SCMProFit as the universal supply chain solution.
