China medical giant launches CT scanner

Singapore: Neusoft Medical Systems, a wholly-owned subsidiary of Neusoft Corporation has globally introduced NeuViz 64 multi-slice CT scanner. The NeuViz 64 CT, which is pending approval from the US FDA, addresses the issue of costly clinical images of 64-slice scanning equipments that are difficult for small hospitals and clinics to afford.

Neusoft Medical has pioneered the rapid evolution of CT technology in China in order to meet the global demand for high-quality affordable imaging, rapidly progressing from a single slice scanner to the release of the NeuViz 64. The launch of the

NeuViz 64 CT further demonstrates Neusoft Medical's extensive R&D and manufacturing capacity to introduce technology with unprecedented economic feasibility for healthcare providers around the globe.

The NeuViz 64 is the latest installment in what has been a long line of innovative product offerings from Neusoft. This design is focused on minimizing patient X-ray dose, without compromising image quality. These design strategies have resulted in a low dose CT system that delivers high patient throughput, is easy to use, performs advanced cardiac imaging and provides for a wide variety of clinically relevant post processing and diagnostic techniques.

At the launch ceremony of NeuViz 64 CT, Mr Jiang Genmiao, VP, Neusoft Corporation and president, Neusoft Medical said that, "As a medical system supplier focused on software technologies, Neusoft Medical has been driving the trends of China's CT industry by innovatively combining software and product engineering. Neusoft Medical is the only Chinese medical system supplier that can produce CTs, and we are committed to continuous innovation and investment in CT and other new medical products."

At present, Neusoft Medical is expanding its global presence by developing sales and service systems in international markets to support imaging products. Neusoft Medical has achieved ISO 9001 quality system certification for all products, among which, CT, MRI, X-ray, diagnosis ultrasound and PET products have been certified by CE and FDA. The NeuViz 64 complements a full suite of Neusoft Medical CT systems that include the NeuViz Single, NeuViz Dual, and Neuviz 16. These systems are available in over 60 countries. Neusoft has installed bases in the US, Italy, Russia, Portugal, India, Eastern Europe, Middle East, South America and Africa.
